

CoE 197 ME8 Exercise 4

CORONEL, Ysabela Louise O.

2015-01379

In the figure above, I was able to log in to my DockerHub account, search for images, and tag the image that I have created for Exercise 3.

In the command line figure on the left, I removed the old image that I have just tagged and pushed the new image to my DockerHub repository. As shown on the right, the tagged image successfully appears on my DockerHub repository.
